

Freedom Recycling

Quality Policy

Freedom Recycling aims to be the natural choice for all its customers. Our goal is to provide total customer satisfaction by continuously improving procedures and attention to customer care.

We involve our employees in a process to improve all areas of our business by making them aware of how they contribute to quality and by ensuring that they have the necessary skills, resources and support, which will enable them to take responsibility in their jobs. The quality goal applies to both external and internal customers and to contractors and others working with or on behalf of Freedom Recycling.

We will seek to monitor our performance and quality objectives with regard to the total quality of our services to our customers and we will compare our quality with that of others in our market place.
